#### WHAT WE DO

#### Main projects

GLASS HIGH-SPEED DOUBLE EDGER PRODUCTION LINE

GLASS HIGH-SPEED FOUR-SIDE EDGER PRODUCTION LINE

Glass Straight Line Edging Machine

### **Production workshop**

Double Edger Workshop

Four-side Edger Workshop

#### Certificate

# Glass Straight Line Edging Machine

# Folga 富高

#### **Main Performance**

- 1. Suitable for grinding different size and thickness flat glass and the 45° chamfering.
- 2. Rough grinding, refined grinding, polishing and 45° chamfering can be completed in a procession.
- 3. The frequency control for adjusting the conveyance speed offers a wide range of speed selection.
- 4. The front rail could be adjusted to fit the thickness of processing glass.

#### **Electric box**

☑The electric box cover is automatically opened and supported by hydraulic, easier to facilitate daily maintenance and repair.

#### **Grinding head structure**

#### Variable frequency motor

The guide rail on either sites of the main drive, has drainage tray, and both ends of the guide rail have the water-receiving function, which is helpful to keep the machine clean.

#### Glass pressing structure

The front and rear pressing plates all adopt domestic high quality brands.
Electric thickness adjustment.

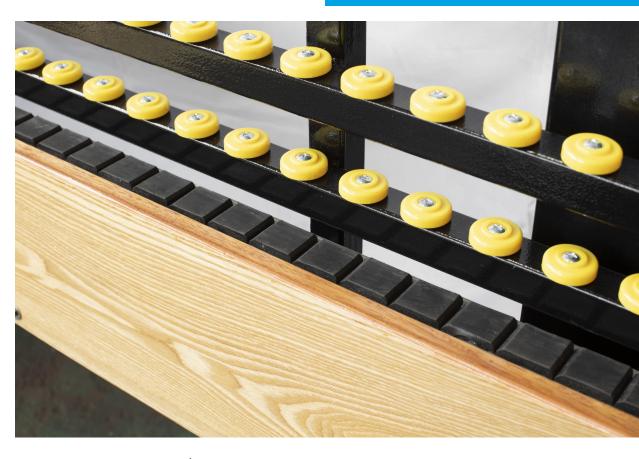

#### Refueling device

☑Oil can be added to the grinding head carriage of the whole machine.

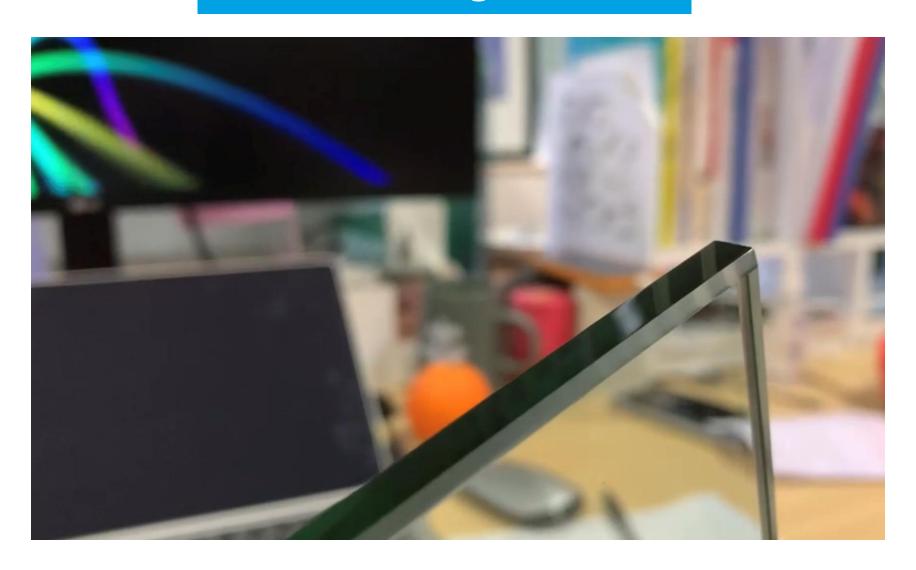

#### Frame tube

Frame tube adjustment is simple, convenient and practical.

#### **Processing Effect**

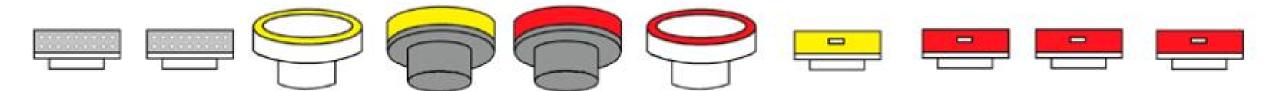

#### **Technical Parameters**

Min Size	100×100mm
Min Size	3000×3000mm
Grinding Speed	1-8m/min
Max Hemline Grinding	2.5mm
Max Chamfer Grinding	3mm
Air Pressure	≥0.6Mpa
Voltage/Frequency	380V/50Hz
Single Power	18KW
Single Weight	3100KG
Working Height	750 ±20mm
